Certificado en Gestion de Proyectos

Leonardo Antonio Maydana

Machine Learning Engineer | Data Scientist | Python developer
Merlo, San Luis, Argentina

Extracto

Hello! I'm Leonardo, a passionate data scientist specialized in machine learning and process automation.

My engineering and project management studies allow me to understand complex information and adapt solutions for the benefit of the interested party.

My experience ranges from developing and implementing ML models to collecting, cleaning, and analyzing vast data sets. My fascination lies in the intersection between technology and business. Also, I'm constantly looking for opportunities to optimize efficiency in organizational decision-making.

I'm an agile learner with strong programming skills and a rigorous approach to solving complex problems. My goals are to contribute to the success of challenging data science and machine learning projects while continuing my professional development.

Let's connect! I'm always interested in exciting collaborations and opportunities. Feel free to contact me through LinkedIn or by email: leomay282@gmail.com.

Experiencia

Scale AI

Computer Science Expert AI Training
febrero de 2024 - Present (2 años 4 meses)
California, Estados Unidos

Company specializing in developing foundational models, offering AI solutions for large enterprises.

- Compare and analyze outputs of various LLMs under training.
- Improve LLM responses for code generation, Q&A, and other objectives.

- Handle implicit code execution: Develop necessary code for prompts requiring additional code routines.
- Test prompts to identify failures during the Q&A process.
- Create prompts for training datasets, focusing on model weaknesses identified by customers.
- Contribute to LLM training for major development companies

Anyone AI

Machine Learning Engineer

enero de 2024 - Present (2 años 5 meses)

Argentina

- Managed and analyzed revenue, delivery metrics, and customer behavior for a leading Latam e-commerce site. Built and maintained an ELT data pipeline, processing information from CSV files and APIs. Utilized SQL queries to extract new data, linking tables to analyze relationships like holiday buying patterns. Assessed delivery performance (timeliness and accuracy) and generated data visualizations with Matplotlib and Seaborn to improve business decisions.
- Developed and implemented a credit risk scoring model using machine learning techniques (Decision Tree, XGBoost, LightGBM) to analyze over 350,000 transactions and predict creditworthiness. Preprocessed and visualized data using Python libraries (Scikit-learn, Matplotlib, Seaborn) achieving a training ROC AUC score of 88% and a validation score of 85%.
- Developed and deployed high-performance Machine Learning APIs using Docker. Designed APIs for image classification tasks (e.g., predicting product content, vehicle make/model), achieving accuracy scores exceeding 80%. Utilized data cleaning, visualization, and augmentation techniques to ensure model performance.
- Developed a deep learning model using convolutional neural networks (CNNs) to predict vehicle make and model from unstructured e-commerce images. Achieved over 82% accuracy on a dataset of 196 classes through data cleaning, visualization, augmentation, and fine-grained model training.
- Developed and implemented a sentiment analysis model to categorize movie reviews for a streaming service. Preprocessed and vectorized text data using techniques like Bag-of-Words (BoW), TF-IDF, and word embedding models. Trained and evaluated different machine learning models (Linear Regression, SGD Classifier) to classify positive and negative sentiment.
- Developed and implemented machine learning models (XGBoost and LightGBM) to predict taxi fare and travel time. Developed and implemented high-performance machine learning APIs using Docker Compose.

Claro Argentina

Analista de soporte para TI

mayo de 2011 - diciembre de 2012 (1 año 8 meses)

Argentina

Análisis y corrección de errores sobre las bases productivas

Educación

Universidad Nacional de Córdoba

Ingeniería, Ingeniería Industrial · (marzo de 2004)

Zero To Mastery Academy

· (enero de 2023)

Universidad Tecnológica Nacional

Diplomatura en Logística · (marzo de 2015 - diciembre de 2015)
